Summary

Web back-end developer, with experience in web application development using NodeJS, Express, PostgreSQL, Git, among other technologies. Currently I work in an early-stage startup, where I help the front-end with the development of APIs and integrations with services like GCP, Firebase and Gitlab CI/CD. I also have knowledge in Typescript, MongoDB, NestJS among other technologies. I also have knowledge and professional experience in the area of marketing and communication, helping me to have a broader vision about product development.

Experience

Full Stack Web Developer/Back-end Developer - **Unmaze** - *March 2022 - Present*

- Development and maintenance of the Unmaze RESTful API, using Nodejs, Express and PostgreSQL.
- Support in front-end development, using React and ChakraUI.
- Deploy using Gitlab's CI/CD tool, Firebase and GCP
- Creation of automations using Cron jobs reducing the creation of tickets for CS

Marketing Assistant - **Realiza Rent a Car** - *September 2018 - October 2020*

- Creation of marketing campaigns for the company
- Creation of content for social networks
- Negotiation with suppliers
- Creation of campaign performance reports
- Management of car advertising platforms (OLX, iCarros, Webmotors, etc)

Education

Bachelor of Communication and Marketing - **Universidade Salvador** - *2015 - 2018*

I graduated in 2018 with merits in the Communication and Marketing course, where I could learn about marketing and communication structures. The college also helped me in the development of essential soft-skills for working as a developer and a broader vision for the construction of products.
